

WHAT IS AI RETRIEVAL?

When someone asks ChatGPT, Claude, Gemini, or Perplexity a question — the AI doesn't search the entire internet in real time.

It pulls from a pre-ranked list of trusted sources. Sources it was trained to trust.

Is your business on that list?

HOW AI DECIDES WHO TO CITE

01 RELEVANCE — DOES YOUR CONTENT ANSWER THE EXACT QUESTION BEING ASKED?

02 AUTHORITY — HAVE OTHER CREDIBLE SOURCES REFERENCED YOU REPEATEDLY?

03 RECENCY — IS YOUR CONTENT FRESH ENOUGH TO BE CONSIDERED CURRENT?

04 FORMAT — IS YOUR CONTENT STRUCTURED THE WAY AI SYSTEMS CAN PARSE IT?

Most local businesses fail all four. Not because they're bad at what they do — because no one built content that AI can read.

4 PLATFORMS DECIDE YOUR VISIBILITY

- **CHATGPT**
200M+ weekly active users. Recommends local businesses, attorneys, property managers, realtors — without a Google search.
- **GOOGLE AI OVERVIEWS**
Appears above organic results. Same retrieval logic as the LLMs — citations go to the most authoritative source.
- **CLAUDE + GEMINI + PERPLEXITY**
All reading the same web. All pulling citations from the same high-authority pool of sources.

WHAT MOST BUSINESSES HAVE

0

AI CITATIONS — THE AVERAGE BASELINE

A website exists. A Google Business Profile is live. Maybe a handful of blog posts from 2021.

None of it is structured for how AI retrieves and ranks sources. The AI doesn't see you. Your competitor who published 48 articles this year does.

THE CITATION GAP IS WIDENING

Every week a competitor publishes authoritative content, their citation count compounds. AI systems weight repeat appearances across multiple sources.

The business that starts building citation authority today will be exponentially harder to displace in 12 months.

The gap between cited and uncited isn't a ranking difference. It's the difference between being recommended and being invisible.

"BUT I RANK ON GOOGLE"

Google ranking and AI citation are not the same thing. They share some signals — but AI Overviews and LLMs pull from a separate authority layer.

A business can rank page 1 organically and still have zero AI citations. We've audited hundreds of businesses. This is the rule, not the exception.

AERO-10 DIAGNOSTIC TESTS BOTH LAYERS.

Ten factors. Free. No sales call required to see your score.

FIND OUT WHERE YOU STAND

The AERO-10 diagnostic scores your business across 10 AI visibility factors. It takes 90 seconds. It's free.

Most businesses score 2 out of 10. The ones that fix it see citation counts compound within 60 days.
